

Flea Treatment

Job Booking – Time and Duration

Flea Treatment duration is approximately 45 minutes. Jobs are booked with a time allocation of arrival e.g. between 10 am and 12 noon. If the Technician arrives at 12 noon; they will finish at 12:45.

Insurance and Australian Standards

Surekill Pest Control Pty Ltd is insured by Pacific International. Our Technicians are licensed by the Environmental Protection Authority EPA. Our Trainees complete the Rapid Training Course and receive on the job training. Our Technicians are trained to deliver a service in accordance with the Australian Standards.

Weather Conditions

Flea Treatments can be done in dry or wet weather, but not if it is windy. It is better if the ground is wet. It is advised to soak the ground before treatment.

Service Period

Flea Treatment has a one month service period. Our Technician will come out in this period if you are still having a problem. \$50 call out fee.

Preparation for Flea Treatment

- Treat your pet/s with a flea treatment
- Cut the lawn short
- Soak the ground with water – grass and garden beds
- Wash all your bedding in hot water
- Wash all pets bedding in hot water
- Vacuum hard floor surfaces, carpets and rugs
- Ensure the contents of your vacuum cleaner are double bagged for disposal

Flea Treatment Time

- Turn off air-conditioners
- Remove pets and their bowls from areas being treated
- Close windows
- Access to subfloor available
- Inform Technician of water tank location
- Cover fish ponds and bird cages
- Chemical sensitive people should leave the premises until the chemical has dried and the premise is fully ventilated

Technician Arrival

Discuss and Inspect – Our Technician will take the time to discuss the flea problem. They will inspect the environment to get an understanding of the problem. Also, they will conduct an Environmental Inspection Report to make sure that it is safe to conduct the treatment as required by the Environmental Protection Authority.

Payment options are cash, credit, eftpos or cheque on arrival. Unless specific written arrangements have been provided the full contract, price shall be due and recoverable prior to treatment.

Flea Treatment

- The Technician will spray all surfaces in and around the property and give complete coverages. We use the safest pesticides available. We recommend an Insect Growth Regulator (IGR) which interrupts the life cycle of the flea.
 - Inside areas: hard floors, surfaces, carpets, rugs and under furniture
 - Outside areas: ground, grass, gardens, yard, patio, verandas, decks
- The Technician will use Dragnet dust in the subfloor. It is a flushing agent that has a good residual life.

After Flea Treatment

- Our Technician will discuss your Pest Management Plan with you. This will include how long until your next treatment and that we will send you a reminder letter. Let the Technician know if you have any other pest concerns that you want treated or monitored. We offer yearly maintenance programs
- Avoid contact with treated surfaces until the Chemical agent has dried

Keep Fleas Away

- Maintain flea treatment
- Regularly vacuum carpets and rugs
- Rodents bring fleas so have a rodent control system in place
- Outdoor sensor lights will keep possums away and help with flea control

Renewal Letter

Your Pest Management Plan will let us know when to send you a reminder letter for your next treatment. Our Surekill Technicians look forward to seeing you again and keeping your environment pest free!
